

```

1 package prg2;
2 class Engine{
3     void start() {
4         System.out.println("engine is starting");
5     }
6 }
7 class car{
8     Engine e=new Engine();
9
10    void stop() {
11        System.out.println("engine is stoping");
12        e.start();
13    }
14 }
15
16 public class composition {
17
18     public static void main(String[] args) {
19         car c=new car();
20         c.stop();
21     }
22
23 }
24

```
